Date	Start Time (24h)	. ,	Duration (hours)	Week Subtotal	Week Overtime	Notes
Week 101	4/1	4/7				
2023-04-04	9:00	10:00	1			Research on <u>super.so</u> and embedded website options for .country
2023-04-06	12:00	12:30	0.5			Prioritizing and debugging knowledge transfer matters and discuss EAS designs and launch plan (Julia, John)
	20:30	21:00	0.5			Discussing PRs for VanityURL and update to DC contract, product issues, and necessity of these changes (Tej)
2023-04-07	11:00	13:30	2.5			Continued discussion regarding VanityURL and DC contracts (Tej, Frank); Setting up EAS for testing, debugging issues (Julia); Updating EAS server, client, contract code to use new DC contracts; Debugging and fixing new issues discovered in testing EAS
2023-04-07	14:00	15:00	1			(Continued)
	17:15	17:45	0.5			Providing solutions to implementation problems in vanity URL, emoji reaction, and DC contract changes (Tej), and discussion on product issues
	21:30	23:30	2	8.0		Research on notion page extraction, parsing, hosting, and existing tools and scripts for doing so
Week 102	4/8	4/14				
2023-04-09	0:00	1:00	1			Research and analysis on Substack integrations, and experiment with potentially simpler paths
	22:00	0:00	2			Notion embedder research, client setups, and server preparations
2023-04-10	17:30	18:00	0.5			Pre-processing 3-character premium domains
2023-04-10	11.00	10.00	0.0			Notion embedder server setup; Registration of 3-character premium domains;
	21:30	22:30	1			Price oracle updates
2023-04-12	11:15	15:45	4.5			Server initial implementation; Testing notion client and evaluate response data and interrpetation; Debugging node module, commonjs, and esm compatibility under typescript due to restrictions in notion-client
2023-04-13	12:30	15:00	2.5			Notion embedder server module implementation, experiments, and bug fixes (import issues, module and esm resolution, latency testing under various settings)
	16:30	18:30	2			Research on DOM parsing and link rewriting approaches and packages
	20:00	0:00	4			Link replacement renderer research and initial implementation
2023-04-14	15:00	16:00	1			Notion embedder link replacement experiments, bug fixes
	22:00	0:00	2	20.5		Notion embedder link replacement research and implementation; design and implement allowlist for page ids; refine client hooks for initialization and updates
Week 103	4/15	4/21				
2023-04-15	0:00	1:30	1.5			(Continued)
	10:30	11:00	0.5			Notion embedder link issue research and analysis using hard-coded parameters
			2.5			Notion embedder client implementation: working manager, minimal ui, route and state refactoring, bug fixes; Secure signature verification research
	13:00	15:30	2.0			
2023-04-16	20:30	23:00	2.5			Secure signature verification research, implementation, Burner v5 testing, state update, deployment and client update Notion embedder (EWS) client refinement
2023-04-16	20:30 0:30	23:00 1:30	2.5 1			update, deployment and client update Notion embedder (EWS) client refinement
2023-04-16	20:30 0:30 14:00	23:00 1:30 15:30	2.5 1 1.5			update, deployment and client update Notion embedder (EWS) client refinement Signature security research EWS contract implementation and debugging; Q&A on referral implementation
	20:30 0:30 14:00 18:30	23:00 1:30 15:30 22:30	2.5 1 1.5			update, deployment and client update Notion embedder (EWS) client refinement Signature security research EWS contract implementation and debugging; Q&A on referral implementation (Abhinav)
2023-04-17	20:30 0:30 14:00 18:30 22:00	23:00 1:30 15:30 22:30 0:00	2.5 1 1.5 4			update, deployment and client update Notion embedder (EWS) client refinement Signature security research EWS contract implementation and debugging; Q&A on referral implementation (Abhinav) Client-contract communications and client api implementations
2023-04-17	20:30 0:30 14:00 18:30 22:00 22:00	23:00 1:30 15:30 22:30 0:00 1:30	2.5 1 1.5 4 2 3.5			update, deployment and client update Notion embedder (EWS) client refinement Signature security research EWS contract implementation and debugging; Q&A on referral implementation (Abhinav) Client-contract communications and client api implementations (Continued)
	20:30 0:30 14:00 18:30 22:00 22:00 11:00	23:00 1:30 15:30 22:30 0:00 1:30 13:00	2.5 1 1.5 4 2 3.5 2			update, deployment and client update Notion embedder (EWS) client refinement Signature security research EWS contract implementation and debugging; Q&A on referral implementation (Abhinav) Client-contract communications and client api implementations (Continued) (Continued) and research and experiment on DOM parsing Move notion single page crawler and page id parser to server; Client applies id after extraction from url crawl; End-to-end debugging and bug fixes, client experience quality assurance; Deploy and test end-to-end; Update price oracle
2023-04-17 2023-04-18	20:30 0:30 14:00 18:30 22:00 22:00 11:00	23:00 1:30 15:30 22:30 0:00 1:30 13:00	2.5 1 1.5 4 2 3.5 2			update, deployment and client update Notion embedder (EWS) client refinement Signature security research EWS contract implementation and debugging; Q&A on referral implementation (Abhinav) Client-contract communications and client api implementations (Continued) (Continued) and research and experiment on DOM parsing Move notion single page crawler and page id parser to server; Client applies id after extraction from url crawl; End-to-end debugging and bug fixes, client experience quality assurance; Deploy and test end-to-end; Update price oracle (Abhinav); Q&A on dynamic preview (Abhinav)
2023-04-17 2023-04-18	20:30 0:30 14:00 18:30 22:00 22:00 11:00	23:00 1:30 15:30 22:30 0:00 1:30 13:00	2.5 1 1.5 4 2 3.5 2			update, deployment and client update Notion embedder (EWS) client refinement Signature security research EWS contract implementation and debugging; Q&A on referral implementation (Abhinav) Client-contract communications and client api implementations (Continued) (Continued) and research and experiment on DOM parsing Move notion single page crawler and page id parser to server; Client applies id after extraction from url crawl; End-to-end debugging and bug fixes, client experience quality assurance; Deploy and test end-to-end; Update price oracle
2023-04-17 2023-04-18	20:30 0:30 14:00 18:30 22:00 22:00 11:00 20:30 9:45	23:00 1:30 15:30 22:30 0:00 1:30 13:00	2.5 1 1.5 4 2 3.5 2			update, deployment and client update Notion embedder (EWS) client refinement Signature security research EWS contract implementation and debugging; Q&A on referral implementation (Abhinav) Client-contract communications and client api implementations (Continued) (Continued) and research and experiment on DOM parsing Move notion single page crawler and page id parser to server; Client applies in after extraction from url crawl; End-to-end debugging and bug fixes, client experience quality assurance; Deploy and test end-to-end; Update price oracle (Abhinav); Q&A on dynamic preview (Abhinav) Research on summarization tools and products Discussions and planning on AI and product options, and applicability in country and related use cases Enable mail and notion on selected domains, and demo how (Abhinav); Discussions on SMS Wallet integration, dynamic preview rendering, SVG generation, country user experience optimization and security concerns
2023-04-17 2023-04-18 2023-04-20	20:30 0:30 14:00 18:30 22:00 22:00 11:00 20:30 9:45 11:15	23:00 1:30 15:30 22:30 0:00 1:30 13:00 0:30 10:15 12:15	2.5 1 1.5 4 2 3.5 2 4 0.5	20.5		update, deployment and client update Notion embedder (EWS) client refinement Signature security research EWS contract implementation and debugging; Q&A on referral implementation (Abhinav) Client-contract communications and client api implementations (Continued) (Continued) and research and experiment on DOM parsing Move notion single page crawler and page id parser to server; Client applies id after extraction from url crawl; End-to-end debugging and bug fixes, client experience quality assurance; Deploy and test end-to-end; Update price oracle (Abhinav); Q&A on dynamic preview (Abhinav) Research on summarization tools and products Discussions and planning on Al and product options, and applicability in country and related use cases Enable mail and notion on selected domains, and demo how (Abhinav); Discussions on SMS Wallet integration, dynamic preview rendering, SVG generation, .country user experience optimization and security concerns (Abhinav); Knowledge transfer progress and production responsibilities (Julia); Website auto-generation with Al and integration options (Kush, Abhinav) Review articles regarding generative website and content, research related
2023-04-17 2023-04-18 2023-04-20 2023-04-21	20:30 0:30 14:00 18:30 22:00 22:00 11:00 20:30 9:45 11:15	23:00 1:30 15:30 22:30 0:00 1:30 13:00 0:30 10:15 12:15	2.5 1 1.5 4 2 3.5 2 4 0.5	29.5		update, deployment and client update Notion embedder (EWS) client refinement Signature security research EWS contract implementation and debugging; Q&A on referral implementation (Abhinav) Client-contract communications and client api implementations (Continued) (Continued) and research and experiment on DOM parsing Move notion single page crawler and page id parser to server; Client applies id after extraction from url crawl; End-to-end debugging and bug fixes, client experience quality assurance; Deploy and test end-to-end; Update price oracle (Abhinav); Q&A on dynamic preview (Abhinav) Research on summarization tools and products Discussions and planning on AI and product options, and applicability in country and related use cases Enable mail and notion on selected domains, and demo how (Abhinav); Discussions on SMS Wallet integration, dynamic preview rendering, SVG generation, country user experience optimization and security concerns (Abhinav); Knowledge transfer progress and production responsibilities (Julia); Website auto-generation with AI and integration options (Kush, Abhinav)
2023-04-17 2023-04-18 2023-04-20 2023-04-21 Week 104	20:30 0:30 14:00 18:30 22:00 22:00 11:00 20:30 9:45 11:15 13:30 10:30 4/22	23:00 1:30 15:30 22:30 0:00 1:30 13:00 0:30 10:15 12:15 15:30 11:30	2.5 1 1.5 4 2 3.5 2 4 0.5	29.5		update, deployment and client update Notion embedder (EWS) client refinement Signature security research EWS contract implementation and debugging; Q&A on referral implementation (Abhinav) Client-contract communications and client api implementations (Continued) (Continued) and research and experiment on DOM parsing Move notion single page crawler and page id parser to server; Client applies id after extraction from url crawl; End-to-end debugging and bug fixes, client experience quality assurance; Deploy and test end-to-end; Update price oracle (Abhinav); Q&A on dynamic preview (Abhinav) Research on summarization tools and products Discussions and planning on AI and product options, and applicability in country and related use cases Enable mail and notion on selected domains, and demo how (Abhinav); Discussions on SMS Wallet integration, dynamic preview rendering, SVG generation, country user experience optimization and security concerns (Abhinav); Knowledge transfer progress and production responsibilities (Julia); Website auto-generation with AI and integration options (Kush, Abhinav) Review articles regarding generative website and content, research related platforms (webflow, wordpress)
2023-04-17 2023-04-18 2023-04-20 2023-04-21 Week 104 2023-04-24	20:30 0:30 14:00 18:30 22:00 22:00 11:00 20:30 9:45 11:15 13:30 10:30 4/22	23:00 1:30 15:30 22:30 0:00 1:30 13:00 0:30 10:15 12:15 15:30 11:30 4/28	2.5 1 1.5 4 2 3.5 2 4 0.5 1	29.5		update, deployment and client update Notion embedder (EWS) client refinement Signature security research EWS contract implementation and debugging; Q&A on referral implementation (Abhinav) Client-contract communications and client api implementations (Continued) (Continued) and research and experiment on DOM parsing Move notion single page crawler and page id parser to server; Client applies id after extraction from url crawl; End-to-end debugging and bug fixes, client experience quality assurance; Deploy and test end-to-end; Update price oracle (Abhinav); Q&A on dynamic preview (Abhinav) Research on summarization tools and products Discussions and planning on AI and product options, and applicability in country and related use cases Enable mail and notion on selected domains, and demo how (Abhinav); Discussions on SMS Wallet integration, dynamic preview rendering, SVG generation, country user experience optimization and security concerns (Abhinav); Knowledge transfer progress and production responsibilities (Julia); Website auto-generation with AI and integration options (Kush, Abhinav) Review articles regarding generative website and content, research related platforms (webflow, wordpress) Review dynamic preview implementation references and proposal, provide
2023-04-17 2023-04-18 2023-04-20 2023-04-21 Week 104	20:30 0:30 14:00 18:30 22:00 22:00 11:00 20:30 9:45 11:15 13:30 10:30 4/22	23:00 1:30 15:30 22:30 0:00 1:30 13:00 0:30 10:15 12:15 15:30 11:30	2.5 1 1.5 4 2 3.5 2 4 0.5	29.5		update, deployment and client update Notion embedder (EWS) client refinement Signature security research EWS contract implementation and debugging; Q&A on referral implementation (Abhinav) Client-contract communications and client api implementations (Continued) (Continued) and research and experiment on DOM parsing Move notion single page crawler and page id parser to server; Client applies id after extraction from url crawl; End-to-end debugging and bug fixes, client experience quality assurance; Deploy and test end-to-end; Update price oracle (Abhinav); Q&A on dynamic preview (Abhinav) Research on summarization tools and products Discussions and planning on AI and product options, and applicability in country and related use cases Enable mail and notion on selected domains, and demo how (Abhinav); Discussions on SMS Wallet integration, dynamic preview rendering, SVG generation, country user experience optimization and security concerns (Abhinav); Knowledge transfer progress and production responsibilities (Julia); Website auto-generation with AI and integration options (Kush, Abhinav) Review articles regarding generative website and content, research related platforms (webflow, wordpress)

			Total	77.5	
	21:00	0:00	3	19.5	(Continued) Client manage implementation with recursive crawler, end-to-end debugging and testing
	17:00	19:30	2.5		Recursive notion crawler implementation
	14:00	15:00	1		Substack connector research, design and writeup
2023-04-28	23:45	1:15	1.5		Review and provide feedback on new EAS frontend implementation; Review and diagnose renewal revert issue; Review customer email and draft response
	21:30	22:00	0.5		DNS server downtime emergency response, diagnosis, and preventive measures for future incidents
	14:00	16:00	2		Discussion on video editing and transcription, recovery analytics and next steps, stablecoins
	11:30	12:30	1		In-person discussion on web platforms and use cases for .country; Discussion on wallet integration for session key and next steps of contract change
2023-04-27	9:30	10:00	0.5		Review renewal revert issue; Review Circle cross-chain bridge and stablecoin updates
	23:45	0:15	0.5		Review and analyze Protofire code
	19:30	22:00	2.5		Review Maker Protocol technical presentation and contract design in detail, analyze complexity and make recommendations on practical implementation routes and tradeoffs
	15:00	17:00	2		(Continued) and research on DAI simulator, review proposed AMM curves of Gyroscope, review Liquity documentation and stats
